

Ultratec, LLC Your Weather Tight Structure Specialist

Swan Crossing at Andover Country Club, Andover MA

Shepard's Cove, Kittery, ME

Heritage Woods, Lynnfield, MA

Andover Country Club, Andover MA

From a plan to engineering and estimating, production, delivery, framing to a finished product, Ultratec does it all.

We can offer traditional stick framing which requires less planning ahead, is budget friendly and can be more flexible to last minute changes. We also offer an engineered system of manufactured wall panels, floor trusses and roof trusses which assembles quickly and is environmentally friendly. Whether you choose a conventionally stick-framed building or a prefabricated engineered system or a combination of both, we take pride in our quality service, guaranteed pricing, finished products, labor force and on-time delivery and assembly. All with a one year warranty from Ultratec on materials and installation.

Free Estimates and Customer Service is what sets Ultratec apart. Our estimating department can provide an accurate quotation on the project you are doing from a single building to multiple buildings using the latest estimating and engineering software that our team has been certified on. We know the current costs, industry conditions and availability of labor. All installation and assembly of Ultratec's products is by qualified craftsmen. Once your project has been established, Ultratec offers guaranteed pricing. We offer pricing options, value engineering and can assist with design ideas.

One company to support your building projects.

Founded in 1999, Ultratec has been building weather tight structures catering to the needs of the general contractor, developer and architect. We have set the standard as the market leader in supplying materials and labor for engineered and conventional framed projects.

Over the years Ultratec's success in meeting our client's goals has allowed us to grow in size and project capability. Ultratec continually dedicates itself to being a leader in the industry of building weather tight structures in the New England area.

Our office and sales team are there to answer your questions with efficiency and follow through with paperwork in a timely manner. We know that meeting the needs of the client are paramount to a successful project.
