

Superior Rail & Iron Works Celebrates 45th Anniversary!

Above and right: Staircase at Jordon Hospital

East Bridgewater, MA--Superior Rail & Iron Works, Inc., (SRI), is celebrating its 45th year in business this month. The company is a leading fabricator and erector of architectural metal work along with miscellaneous iron and light structural steel in New England. Lenny Ferrara, Jr., President and CEO, said, "Our competitiveness and the quality of our product will keep Superior Rail a leader in our industry for the next generation."

Ferrara, Jr.

Ferrara noted that SRI is a second generation company that offers a complete range of services in this field. "We have achieved a great milestone in a very competitive market and have been very successful in the construction industry, which

over the years has been extremely volatile," he said. "Our competitiveness and the quality of our product will keep Superior Rail a leader in our industry for the next generation."

SRI was founded by Lenny Ferrara, Sr., in 1963 in an old renovated mill building in Stoughton as a residential fabricator of home ornamental railings. Two years later the business grew and moved into a new building on Mill St. in Stoughton. In the early 1970's SRI expanded into the commercial market supplying steel stairs, aluminum rails, ornamental rails, and light structural steel to a number of local contractors.

As SRI's market expanded to projects throughout New England, the company purchased 25+ acres on route 106 in East Bridgewater in 1986 ,and erected a 25,000sf fabrication and office facility.

SRI employs a trained staff of steel fabricators, steel erectors, detailers, project managers, estimators and design personnel.

The drafting and engineering departments utilize the latest AutoCAD systems, and estimators work closely with contractors and architects to budget the miscellaneous and architectural steel

requirements for projects throughout New England.

Some of SRI's current projects include 1330 Boylston Street,Boston; Residences at the Natick Mall, Natick; the Mandarin Oriental Hotel, Boston; The Tower at Carnegie Abby, Portsmouth, RI; Emerson College, Boston and The W Hotel,Boston.

SRI has completed such projects as Fenway Trilogy, Boston; 60 Second Avenue, Waltham; Manulife Financial,Boston; Renaissance Marriott,Boston; Skyline at Station Landing, Medford; Nantucket Museum, Nantucket, UMass-Dartmouth, and Boston Convention Center Architectural glassrail system.

Anthony Ferrara currently manages the day to day operation of Superior Rail and will become the third generation owner.

"Superior Rail & Iron has been building New England since 1963 and will continue to produce quality products with competitive value for the next 45 years." he said.
